                                                                                                                                                                                                                                                                                                                                              SUBCELLULAR LOCATION: Integral membrane protein.
TISSUE SPECIFICITY: Widely expressed, with highest levels in heart, placenta, spleen, peripheral blood leukocytes and adregland. In lung, expressed in the interstitial macrophages, an
                                                                                                                                                                                                                                                                                                                                                                                                                    mediated via a G-protein that activates a phosphatidylinositol-calcium second messenger system. Stimulation by BAY u9773, a partial agonist, induces specific contractions of pulmonary veins and might also have an indirect role in the relaxation of the pulmonary vascular endothelium. The rank order of affinities for the leukotrienes is LTC4 = LTD4 >> LTE4.

FUNCTION: RECEPTOR FOR EXTRACELLULAR ADENINE NUCLEOTIDES SUCH AS FUNCTION: RECEPTOR FOR EXTRACELLULAR ADENINE NUCLEOTIDES SUCH AS ATP AND ADP. SEEMS TO MEDIATE ITS ACTION VIA A PERTUSSIS TOXIN INSENSITIVE G-PROTEIN, PROBABLY BELONGING TO THE GQ FAMILY THAT ACTIVATE A PHOSPHATIDYLINOSITOL-CALCIUM SECOND MESSENGER SYSTEM. SUBCELLULAR LOCATION: Integral membrane protein.

TISSUE SPECIFICITY: BRAIN, SPINAL CORD, GASTROINTESTINAL TRACT, SPLEEN AND LEG MUSCLE. IS NOT DETECTED IN THE HEART, LIVER,
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             s SWISS-PROT entry is copyright.
